Summary

Full Stack Developer experienced in building scalable APIs, AI-powered platforms and distributed systems in startup environments. Skilled in Rust, Node.js, PostgreSQL, React, and cloud-based architectures with hands-on experience in backend optimization, authentication flows, database design, and production deployments. Strong ownership mindset, experience driving engineering decisions and working cross team.

Skills

- **Languages:** Rust, Java, JavaScript, Python, SQL
- **Backend:** Node.js, Spring Boot, Axum, REST APIs, Authentication, API Design
- **Frontend:** React.js, Redux, Tailwind CSS
- **Databases:** PostgreSQL, Firebase Realtime Database
- **Cloud Tools:** Git, GitHub, Postman, Cloudflare R2
- **Concepts:** Distributed Systems, System Design, Agile Methodology

Experience

- **Founding Engineer**
Terrasun Technologies — Feb 2026 – May 2026
[Terrasun Technologies](#)
 - Developed and optimized backend APIs using PostgreSQL; improved response times by 40% with query optimization and caching strategies.
 - Contributed to full product development lifecycle including API design, database architecture and deployment workflows.
 - Leading a team of 3 engineers, owning backend architecture decisions.
- **Backend Developer Intern**
IntelliConnectQ Analytics — Aug 2025 – Oct 2025
[IntelliConnectQ Analytics](#)
 - Created and supported scalable REST APIs using Rust, Axum, and PostgreSQL.
 - Enhanced API performance through use of optimized query structures and back-end optimization methods.
 - Developed secure APIs for Excel-upload ingestion, including backend validation and optimized database management.
- **JavaScript Development Intern**
RanchiMall — Nov 2024 – Feb 2025
[FloPay](#)
 - Implemented 90% of USDT transaction functionality in FLOPAY.
 - Built UI modules following strict design guidelines.
 - Collaborated with core team on production repository.

Projects

- **MEMORA AI**

[Github](#)

- An AI powered smart gallery platform that uses facial recognition and automatic image clustering to intelligently organize photos. Scalable cloud storage, real-time image processing and backend workflows tuned for high volume uploads and a seamless user experience.

- **FLOPAY**

[FloPay](#)

- Blockchain based payment platform to make secure USDT transactions and hack-proof payment verification. It has scalable backend workflows, production ready APIs, and robust transaction tracking for transparent and secured digital payments.

- **AI-BASED-SKIN-DISEASE-DETECTION**

[Github](#)

- A CNN-powered React.js web app that identifies skin diseases from images - featuring real-time predictions, data-augmented training, and an intuitive UI to support early and accessible healthcare diagnostics.

Education

Sinhgad Institute of Technology and Science

Bachelor of Engineering, Information Technology

Nov 2022 – Present

SGPA: 8.6/10
